

Email / Phishing Precautions: Unfortunately, it is our cooperative and helpful natures upon which these schemes rely. Here are some steps that can protect our parish. Know that it is ok to re-direct an inquiry to the ministry staff or vestry member who is directly responsible for the information. Obtain information for yourself directly from the staff or committee member responsible for that information. Examine email addresses suspiciously for titles or positions in the e-address &/or excessive punctuation. Take time to look over emails from header-footer !Warning! messages. If you receive an email you believe to be phishing, please contact Vanessa Apicello in the church office for confirmation and reporting.
